AI & Automation: Conversational AI, API Integration, n8n, Python.

Backend & Databases (Basic Knowledge): Node.js, PHP, MySQL, SQL.

Tools & Methods: Git, Trello, Jira, Slack, Project Management.

Personal Projects

AI Social Media Assistant (Self-Initiated Project)

May 2025 – Present | Remote

- Developing a conversational AI assistant to automate customer support responses across multiple social media platforms.
- Integrating Meta (Instagram, WhatsApp) and Telegram APIs for centralized message handling.
- Building a management dashboard using React.js for bot configuration and analytics.

Work Experience

Frontend Developer | Pact Studio Inc. (Part-time)

April 2025 – Present | Remote

- Collaborating within a 5-person agile team to design, develop, and deploy high-impact e-commerce solutions for consumer brands.
- Developing and maintaining scalable web applications, ensuring alignment with client's strategic.
- Successfully transitioned from on-site to a fully remote, part-time role (from Italy) in April 2025.

Frontend Developer | Self-Employed (Freelance)

August 2018 – March 2025 | Remote

- Developed and maintained over 50 websites using modern web technologies, achieving an average 30% increase in client traffic.
- Managed the full project lifecycle for 35+ clients, from requirement gathering and UI/UX design to deployment and hosting.
- Ensured 100% mobile-friendly designs, leading to a 40% increase in mobile user engagement.

Founder & Frontend Developer | Italy Education Club

Aug 2022 – Sep 2025 | Remote

- Developed and managed the company's core platform (italyeducationclub.com), focusing on the client acquisition and application-processing UI.
- Designed and implemented structured digital workflows, which reduced application processing time by 20%.
- Scaled the platform to successfully process over 500 client applications.

Additional Experience

- **Founder & Developer** | Flue Talk (Part-time) | Remote | Nov 2024 – Sep 2025
- **Project Development** | Sharstan Engineering Co. (Part-time) | Iran | Jan 2020 - Jun 2020

Education

Bachelor of Information Engineering

Sep 2021 – Present | University of Padova, Italy

- Developing key projects in Machine Learning (using Python/Java) and designing and programming a robotic controller (using MATLAB).
